Adventure?  
Easy.

## mylife CamAPS FX

For children and young people.

The only AID algorithm licenced from 2 years old.

## mylife Loop powered by CamAPS FX

The only AID algorithm licenced from 2 years and up.

The mylife CamAPS FX app is personalised and adaptive; it constantly learns and quickly adapts to ever changing insulin needs. It adjusts to diurnal and day-to-day variations in insulin requirements and compensates for over and under-dosing of the meal bolus. For increased privacy and convenience, you can deliver a meal bolus directly from your smartphone.

- Glucose levels are measured by the Dexcom G6 or Abbott FreeStyle Libre 3 continuous glucose monitoring systems.
- mylife CamAPS FX adjusts insulin delivery level every 8 to 12 minutes, based on the current and the predicted glucose levels.
- Insulin is delivered with the small and lightweight mylife YpsoPump.
- Remote monitoring for parents and caregivers thanks to Companion remote monitoring that mirrors data from the user's mylife CamAPS FX app

## Take home messages from clinical trials

For children and young people

- Increased quality of life and reduced burden<sup>1</sup>
- Increased time in range
  - 9% in young children aged 1 to 7 years old<sup>2</sup>
  - 11% in people over 6-years-old (including adults)<sup>3</sup>
- Reduction in HbA1c of 0.4% across all age groups<sup>2,3</sup>
- Reduction of hypoglycaemia<sup>2</sup>
- Psychosocial benefits reported by parents and caregivers included improved sleep, improved quality of life, and reduced burden of diabetes<sup>4</sup>

“

“She can be playing in the garden outside, and I can just kind of hang out of the window and give her [insulin]...I don't have to get her to stop what she's doing.”<sup>5</sup>

“

“Night-time is probably the most dramatic difference...we probably are only woken by alarms twice a week...we trust it. Honestly, the line is deadly straight overnight.”<sup>5</sup>
